REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claim 1 limits the crop processing arrangement, take-up device and transverse conveyor all being generally equally wide and being considerably wider than the inlet of the baler. A crop processing arrangement that is wider than the inlet of the baler in combination with the remainder of the claims is not found in the prior art of record.

Grahl et al. discloses a baler with a crop take-up device and a transverse conveyor with is wider than the inlet of the baler so that a larger windrow can be picked up in one pass. However, Grahl et al. does not disclose a crop processing arrangement. Uros et al. discloses a crop processing arrangement that is not wider than the inlet of the baler but is the same width as the crop take-up device and a transverse conveyor. The prior art is does not provide a teaching or suggestion of additionally making the crop processing arrangement wide when the crop take-up device and transverse conveyor are made wider for picking up the crop of a larger windrow in one pass. This teaching is missing in the combination of Grahl et al. and Uros et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
